

CERACOAT®DES

long-lasting hard surface coating

(Active for 6 months!)

anti-bacteria + anti-virus

Cleans, seals and protects hard surfaces

CERACOAT®DES - BIOFLAVONOID TECHNOLOGY

POWERFUL PLANT-BASED ANTIMICROBIAL, ANTIVIRAL AND ANTIFUNGAL PROTECTION - Kills up to 99,99% of bacteria and viruses and lasts for up to **6 months**. Highly effective surface disinfectant / coating.

HELPS TO REDUCE
MICROBIAL BUILD-UP
ON SURFACES FOR
UP TO 6 MONTHS!

- **KILLS UP TO 99.99% OF BACTERIA AND VIRUSES**
- **HELPS PREVENT CROSS INFECTION RISK**

CERACOAT®DES is a cleaner/disinfectant/coating/protector which leaves behind a Multi-Functional barrier on the surface with:

NATURAL AND ORGANIC COMPOUNDS
SAFE AND ECO-FRIENDLY FORMULATIONS
NON-TOXIC AND NON-ALLERGIC SOLUTIONS
SUSTAINABLE, RECYCLED AND RECYCLABLE
FOOD SAFE INGREDIENTS

Hard Surface Sealant creates a microbiota barrier seal that helps to prevent cross infection by creating a hostile environment for pathogens and biofilm

In contrast to conventional disinfectants, antibacterial and antimicrobial protection occurs after a short time and provides lasting protection against viruses, bacteria and microbes for up to **6 months**.

No need of disinfectants any more for 6 months!

Viruses are the most common cause of infectious disease acquired in the indoor environment in hospitals, schools, work environments and households causing considerable impact on human health.

COVID-19 has provided horrific insights into the mechanics of contagion and cross infection globally. Viruses are attached to droplets of moisture which move from the infected person via the air to high risk touch points.

CERACOAT®DES HARD SURFACE SEALANT SPRAY

Ideal for smooth non-absorbent high-risk touch points, including: doors, handles, elevator buttons, stair rails, loo seats, switches, touch screens, mobile phones, shopping trolleys, credit cards, desk surfaces, payment terminals, shopping areas, etc.

Description Additional information:

CERACOAT®DES: Bioflavonoids – a large group of non-toxic natural plant components – are widely recognized in healthcare for their potent natural antioxidant, anti-inflammatory, anti-allergy, antibacterial, anti-fungal, antiviral, neuroprotective and healing activity, helping to fight even antibiotic-resistant bacteria.

Our patented bioflavonoid complex offers natural, safe and powerful protection against prevalent respiratory infections such as SARS-COVID, Influenza and Rhinovirus. The formula has been proven by independent laboratories to destroy both enveloped and non-enveloped viruses within 1

to 5 minutes upon contact, depending on concentration and virus type, deactivating their ability to multiply and further infect healthy cells, while using organic, food-grade, GMO-free and generally non-allergenic plant-based ingredients.

Use:

Apply **CERACOAT®DES** long-time disinfectant to the surface and spread evenly with a cloth. Let dry. Do not rinse.

Can be used on all surfaces. Sustainable antimicrobial effect for up to **6 months** (tested according to ASTM E 2180)

(Tested and Certified according to: EN 13624:2013 – EN 1650:2019 – EN 1276:2019 – EN 13727:2012 + A2:2015)

* All tests and certificates are at your disposal

(enveloped viruses including coronavirus, HIV, HBV, HCV, herpes, influenza, Ebola virus ...)
